

2010 Annual Report

Conservation Stewardship Program (CSP)

This report contains fiscal year activity for the state of Colorado from the time period of October 2009 to September 2010.

Who We Are

NRCS provides technical and financial assistance to help agricultural producers and others care for the land. NRCS has six mission goals that include high quality, productive soils; clean and abundant water; healthy plant and animal communities; clean air; an adequate energy supply; and working farms and ranchlands.

Vision

Productive Lands -
Healthy Environment

Mission

Helping People Help the Land

“The Food, Conservation, and Energy Act of 2008 (2008 Farm Bill) replaced the Conservation Security Program with the new Conservation Stewardship Program for fiscal years 2009 through 2017.”

Fiscal Year 2010 Conservation Stewardship Program Statewide Activities

Number of Applications Contracted	471
Dollar Amount Approved.....	\$11.8 Million
Acres under Contract	1,267,194

The Program

The Conservation Stewardship Program (CSP) is a voluntary program that encourages agricultural and forestry producers to address resource concerns by:

- undertaking additional conservation activities, and
- improving and maintaining existing conservation systems.

CSP provides financial and technical assistance to help land stewards conserve and enhance soil, water, air, and related natural resources on their land.

Eligibility

CSP is available to all producers, regardless of operation size or crops produced, in all 50 States, the District of Columbia, and the Caribbean and Pacific Island areas.

Eligible lands include cropland, grassland, prairie land, improved pastureland, rangeland, nonindustrial private forest land, and agricultural land under the jurisdiction of an Indian tribe.

Benefits to Participants

CSP pays participants for conservation performance—the higher the performance, the higher the payment. It provides two possible types of payments. An annual payment is available for installing new conservation activities and maintaining existing practices.

A supplemental payment is available to participants who also adopt a resource conserving crop rotation.

Through five-year contracts, NRCS makes payments as soon as practical after October 1 of each fiscal year for contract activities installed and maintained in the previous year.

Payment Limit

A person or legal entity may have more than one CSP contract but, for all CSP contracts combined, may not receive more than \$40,000 in any year or more than \$200,000 during any five-year period.

Contract Limit

The contract limit is the same as the payment limit except in the case of joint operations, for which the contract limit is \$80,000 per fiscal year and \$400,000 over the term of the contract period.

Thanks to the diligent work of field and area staff, Colorado obligated 250 contracts on 661,075 acres, and \$5,647,039 in financial assistance for Ranking Period 1.

For Ranking Period 2, 221 contracts on 606,119 acres and \$6,124,161 financial assistance was achieved.

How CSP Works

NRCS makes CSP available on a nationwide basis through continuous sign-up, with announced cut-off dates for ranking

Fiscal Year 2010 Conservation Stewardship Program

and funding applications. CSP addresses seven resource concerns (soil quality, soil erosion, water quality, water quantity, air quality, plant resources, and animal resources) as well as energy.

Each NRCS State Conservationist, in consultation with the State Technical Committee and local working groups, focuses the program on three to five priority resource concerns for their State.

Applications are evaluated and ranked relative to other applications that address similar resource concerns in the State.

In the ranking process, producers get credit both for conservation measures they have already implemented and for new measures they agree to add. Agricultural land and nonindustrial private forest land applications are ranked separately.

Potential applicants are encouraged to determine whether CSP is the right program for them by completing the self-

screening checklist and downloading the CSP Conservation Activity List to identify new conservation activities they might install.

Because some conservation enhancements work better when implemented as a group, the activity list identifies enhancement “bundles” that receive both higher rankings and higher payments. Both the checklist and the activity list are available at www.nrcs.usda.gov/programs/new_csp/special_pdfs/CSP_Producer_Self-Screening_Checklist.pdf.

If an applicant is preapproved for funding, NRCS requests the applicant’s conservation activity records and conducts on-site field verification to ensure that the information provided is accurate. Once the information is verified, NRCS and the applicant proceed to develop the contract.
